

Jump Start Organic Lawn Program

This plan is designed to help transition over to an organic lawn program with success. If you have failed with organics in the past, it's probably because your soil was too depleted to respond to the organics. This plan will boost your soil, feed your microbes, and get you that healthy organic lawn of your dreams!!!

Follow this plan for 1-2 years, then switch to the organic program.

February	Horticultural Molasses and Cornmeal to prevent fungus and feed the soil.
March	MicroLife Hybrid 20-0-5 & Compost tea at 1:10 ratio
April	Top dress with Natures Way Leaf Mold Compost (10 bags/1000 SQFT.)
May	MicroLife Hybrid 20-0-5 & Compost tea at 1:10 ratio
June/July	Apply Micro Life Humates Plus. Monitor lawn for chinch bug damage, if you get them, treat with Organicide.
August	Horticultural Molasses and Cornmeal to prevent fungus and feed the soil.
September	MicroLife Hybrid 20-0-5 & Compost tea at 1:10 ratio
October	If brown patch pops up, treat with compost tea undiluted
November	Apply Gro-Smart 5-2-16
